01 · GETTING IN

The handles are in plain sight. They don't hide and have no buttons - you grab them like any handle.

No need to explain to parents how to use the handles

04 · THE SELECTOR

Jump in your sit, put it in D and go. P has its own button.

09 · NOT JUST MY TASTE

From 2026, Euro NCAP gives points for physical controls.

02 Steering - a mechanical stalk, two seconds
03 Windows - four buttons, found without looking
06 Glovebox - opens by hand, not from a menu
✦ Physical, with a click - the wheel buttons, the volume knob, the hazards

Analog doesn't mean old-fashioned. It means you know what a thing does before you touch it.

And in China, from 2027, a car without a mechanical door release gets no type approval.
